

EU32i

3,200W Portable, Inverter Technology Generator

Award winning for power and portability

The EU32i was awarded a Red Dot Award for Product Design – an honour given on products that excel in design quality and innovation. It was commended on its immense power in a consumer-friendly, smartly designed package and world-first integration of a high-output engine into a portable, fuel-injected generator.

Lightest and most compact in its class

The newly developed design and compact, lightweight shape means you'll find the EU32i simple to carry and move to where you need power.

Eco Throttle

Eco Throttle allows the generator to automatically adjust engine speed and ensure an optimum amount of power is used.

Intuitive App Control

A clever smartphone app uses Bluetooth to keep you connected, allowing you to monitor, operate key functions, and even stop your generator remotely. You can also find key service information, maintenance alerts and find a dealer for assistance.

Under-grip

The lightweight body has a carry handle with under-grip making it even easier for you to pick up and carry.

Increased fuel efficiency

The generator has fuel-injection to optimise fuel use, and, when engaged, the built-in Eco Throttle automatically adjusts output to provide the correct amount of power required.

Cleverly designed interface

The simplified control panel has each function clearly visible – you can start your engine in just two easy steps.

Anti-vibration system

Vibration can contribute to wear and tear on your machine. We've added straight engine rubber mounts to reduce mechanical stress on the entire unit.

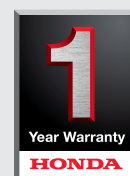

Small but mighty.

Whether it's required for everyday and professional activities, or just the occasional emergency use, experience continuous performance from a highly dependable power supply that you can trust. The new Honda EU32i generator is incredibly versatile with high-spec features and an intelligent design that makes it easy to use, start and carry. Offering a high-performance engine with built in fuel-injection for superb fuel economy, our newest generator provides class leading portable power whilst keeping emissions low. From events and construction sites to caravans and summerhouses, the EU32i was made for real life.
